## *“Harvesting You*

Dear Dairy Producer,

You know it takes a lot of know-how, skill and plain hard work to succeed in the dairy business today. To make that job a little easier, the University of Illinois is offering a series of one-day meetings for dairy operators. The 1980 Illinois Dairy Days are geared to help you make the most of your resources so you can keep your place among top dairy producers.

Eight area Dairy Days are scheduled throughout the state during January. At each session, specialists will answer your questions about dairy feeding, health and management. They will have plenty of good information that you can take home and put to work for you. The entire program is designed to help you get peak production and top profits from your herd.

Take advantage of this expert dairy information presented close to home. Attend one of the 1980 Illinois Dairy Days. And put yourself a step closer to “harvesting your milk potential.”

Sincerely,

*M.F. Hutjens,*

Michael F. Hutjens  
*University of Illinois  
Extension Dairy Specialist*

*State/County/Local Groups/U.S. Department of
